Subject: Red Hat Proposal

As a past college professor and a current professional in the software
industry, I urge the Department of Justice to consider seriously and
look favorably on the proposal by Red Hat, Inc. to modify the Microsoft
Antitrust settlement regarding computer equipment to be donated to
public schools by Microsoft. The Red Hat proposal provides a much larger
net benefit to the schools than the original settlement proposal, at no
additional direct cost to Microsoft.

Sincerely yours,

Jeffrey A. Bell, Ph.D.
